To prevent a cold take 666. adv. 2-22

Most teachers of the county understand that the County Board of Education does not allow pay for any time lost during Christmas holidays, and that the length of the holiday season given by each school does not matter so far as the board is concerned. Each school can give such a holiday as is most pleasing to the teacher and parent, and when 20 days have been taught report for a month can be made, thus leaving out consideration of the holiday entirely.

Help the band boys. Buy a ticket to their picture show Tuesday Dec. 28

LAUGHTER OF CHILD SCARCE IN POLAND

"In all the time I was in Poland, I scarcely once saw a child laugh," declared Dr. Harry Plotz, discoverer of the typhus bacillus, in a report to the European Relief Council on medical conditions among the Jewish population of Poland, based on his recent investigations there for the Jewish Joint Distribution Committee.

"The most deplorable sight of all the miseries in Poland is the condition of the children," Dr. Plotz said. "Infant mortality is exceedingly high because of under-nourishment and the high percentage of contagious diseases. In large part mothers must resort to artificial feeding as they are unable to nurse their children. In many cities I saw underfed children, suffering with diseases, wandering about the streets with no place to go, begging for bread."

Tuberculosis has become prevalent among the Jewish children, largely due to the overcrowded conditions in which they are forced to live, their lack of nourishing food and warm clothing, according to Dr. Plotz. Typhus, which killed thousands of Jews last winter in the worst epidemic Poland has ever seen will recur again, he said, as conditions are much worse among the Jews than ever before.

"Favus, a contagious skin disease, is now rapidly spreading from child to child," he continued. "In Vilna there are 11,000 cases among the Jewish children alone. Smallpox, too, is prevalent throughout Poland and the Ukraine and children, with widespread eruptions and temperature, have been seen running about the streets. There are thousands of cases every year, which vaccination would prevent, but there is no vaccine."

Dr. Plotz told how in Lithuanian villages he found children, six and seven years old, unable to walk or talk, the result of malnutrition. In regions where whole towns had been destroyed during the war, he found families crowded in miserable dug-outs.

The Greatest Gift.

Your Christmas gift to the European child relief collection may help in saving a child's life and is earnestly solicited. Send checks to the local committee of the joint organizations or direct to European Relief Council, 42 Broadway, New York City.

EUROPEANS PLEADING FOR THEIR CHILDREN

Elder Generation Sacrifices Self That Hope of Future May Receive Means of Life.

The one optimistic note in the desperate need prevailing through the war-torn areas of eastern Europe is the extraordinary and touching faith of the people in the children. The elder generation has put all its hope and trust in the future of the generation now in its early years. In fact, in many instances it is deliberately sacrificing itself for the children, the Europe of tomorrow.

In the war-ravaged districts supplies necessary for maintenance of institutions are lacking, but it has been noted that always the request for outside aid emphasizes the needs of the orphanages. How marked is this inclination was indicated by the fact that one district of Poland the authorities, appealing to an American relief organization for assistance, asked assistance for only one military hospital, four general hospitals and twenty orphanages.

The appeal has reached America with the result that because they know that literally millions of European children face starvation and death from disease unless the aid that only this country can give is forthcoming, eight great American relief agencies have banded together under the name of the European Relief Council to raise \$33,000,000 needed to tide the baby generation of Europe over possibly the most critical winter it has yet faced. These are the American Relief Administration, the American Red Cross, the American Friends Service Committee (Quakers), the Jewish Joint Distribution Committee, the Federal Council of Churches of Christ in America, the Knights of Columbus, the Y. M. C. A. and the Y. W. C. A.

FOREIGNERS SENDING VAST RELIEF HOME

Over 90 Per Cent of Food Drafts Sent to Europe Gifts From Immigrant Population.

Out of their earnings, for the most part as unskilled laborers, living from hand to mouth, the foreign-born element in the United States is contributing largely to the funds for food supplies to aid the starving peoples of their native lands.

Figures from the Food Draft section of the American Relief Administration show that \$593,110 had been sent to Poland, up to the end of November. \$158,170 had been sent to Czechoslovakia, Hungary had received \$382,700, Germany had \$1,443,619 and Austria \$2,046,720. It was estimated that more than 90 per cent of this money had been spent by nationals of these various countries who are now in the United States. There are about 1,500,000 Poles, 800,000 Hungarians, 500,000 Czechs and 600,000 Slovaks in this country.

The profits which resulted from the sale of these food drafts have been turned into the fund for general child feeding. It is to bring this fund up to the point where it can meet the demands on it, to save the lives of 3,500,000 children that the European Relief Council has been formed by eight great relief organizations.

Rickets Did This.

This Vienna child is six years old, but because of the ravages of rickets, the disease born of under-nutrition that has stricken thousands of European children, she is able to toddle about only by dint of supreme effort. The spread of this terrible disease of childhood and the rescue of those already in its grip can only be accomplished by America. That is why eight great American relief organizations have banded together under the name of the European Relief Council in a joint appeal to the American conscience for funds.

"Felt Like Eating"

Man and Wife, All Run-Down from Farm Work, Were Greatly Helped by Ziron.

"MY WIFE and I, after a hard spring on the farm, were tired and run-down," says Mr. E. B. Mulkey, of Route 1, Acworth, Ga. "We neither felt well. I knew my blood was bad, as I had little boils on the back of my neck."

"We felt we needed a builder. We had heard of Ziron and thought it must be what we needed. It certainly was. We took it faithfully, and after a week or so such a matter we began to feel better. My wife felt like cooking, and I sure felt like eating."

"Ziron sure did us good. It made us both feel stronger and better for the fall work, which everyone knows is 'some work' on a farm. My boils began to dry up, though just at first they seemed worse."

"We are much better and can highly recommend Ziron, and gladly do so for it sure did us good."

Ziron is a safe, reliable, tonic medicine, good for men, women and children, when an iron tonic is indicated. It is easy to take and contains no habit-forming drugs.
